

AHConnect

Smart connectivity solutions for furniture integration

Why Arthur Holm?

1

Customization for prestige

Boardroom and meeting tables are often custom-built to reflect the company's identity. With seamless cable management, technology enhances rather than distracts from the prestige of the brand. Our modular, customizable portfolio –powered by an intuitive configurator– lets you design a connectivity solution that perfectly blends elegance, discretion, and usability.

2

Craftsmanship preserved

The boardroom table is often the centerpiece of the room. Technology should integrate seamlessly without sacrificing durability or the beauty of fine joinery, veneers, and finishes. Our connection boxes blend into the surface, matching veneers, metals, or subtle finishes, preserving the design's visual harmony.

3

Effortless User Experience

Technology should enhance meetings, not complicate them. With built-in access to power, data, HDMI, USB-C, and more, participants can connect instantly –free from delays or technical hassle. This effortless simplicity fosters productivity, keeping the focus on the conversation rather than the cables.

4

Safety, Durability & Reliability

Loose cables aren't just unsightly –they can damage equipment and create tripping hazards. Integrated systems protect cables and devices, extending their lifespan while keeping the space safe and efficient.

AHConnect

Smart connectivity solutions for furniture integration

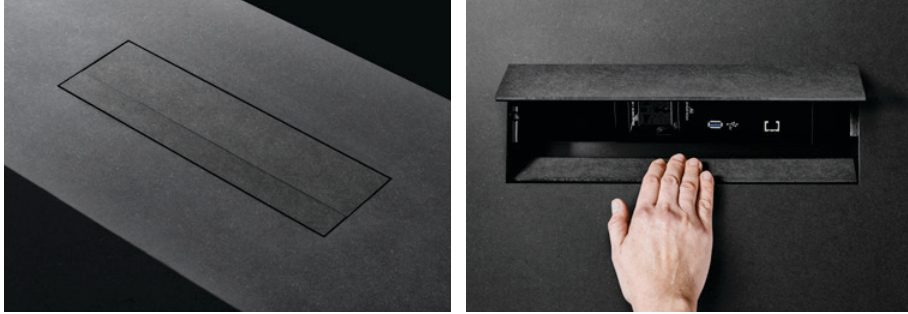

Seamless cable management technology

Arthur Holm crafts a wide range of motorized and manual connection systems designed for seamless furniture integration. Ideal for meeting rooms, boardrooms, and control centers, our solutions are easy to install, simple to veneer, and always in harmony with the table's design. Our portfolio is comprehensive, modular, and fully customizable. And with our intuitive configurator, you can design a connectivity solution that blends elegance, discretion, and usability.

Connect2H

Customizable manual Connections

With its discreet design and customizable options, Connect2H delivers connectivity that is intuitive, discreet, and elegant.

The Connect2H is a versatile solution that blends functionality with refined aesthetics, providing access to AV sources, cable management, charging ports and to other connectivity. With a gentle push, its lid opens in two synchronized parts, ensuring a smooth, elegant and unobtrusive user experience.

Highlights

- Available in two versions: integration from above or veneering version for seamless surface matching.
- Three sizes per version, accommodating 4, 7 or 10 modules.
- Wide choice of connection options: power outlets, HDMI, USB passthrough or powered USB, LAN, free buttons, and more.

DynamicConnectTower

Motorized vertical connectivity

DynamicConnectTower ensures flexibility, usability, and design excellence in any collaborative space. And don't forget the WOW factor!

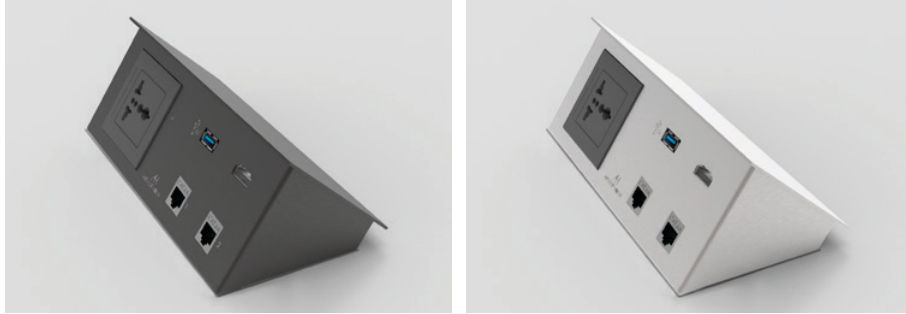

The DynamicConnectTower is a state-of-the-art, motorized vertical retractable connection box, offering an elegant and adaptable solution for modern workplaces and educational environments.

Highlights

- Two versions available: flush mounting and veneering version.
- Includes a retractable USB-C passthrough cable (optional), controlled via capacitive touch button.
- Customizable with power outlets, HDMI, USB passthrough or powered USB, RJ45, and more.
- Operation: manual control or remote control via AHnet or AHlink.

DynamicConnectBar

Ergonomic Motorized Connectivity

A refined solution that enhances both the practicality and design of meeting environments.

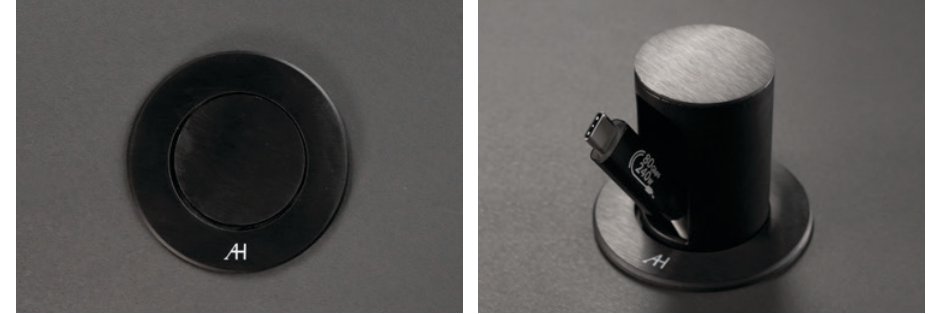

The DynamicConnectBar combines a discreet design with ergonomic usability. Its angled positioning improves comfort and accessibility, allowing effortless device connections.

Highlights

- Available in two versions: tabletop installation or underneath for veneering.
- Fully customizable with power outlets, HDMI, USB passthrough or powered USB, RJ45, and more.
- Controllable via AHnet, AHlink or external buttons for smooth operation.

DynamicCableRetract

Effortless Cable Management

DynamicCableRetract delivers clean, elegant, and efficient connectivity for modern workspaces.

The DynamicCableRetract combines elegance with effortless design. At the touch of a button, a 90 cm pass-through HDMI cable glides smoothly into place, ready for use. When finished, it retracts —by button or remote—leaving your space clean and clutter-free.

Highlights

- At the press of a button, a 90 cm USB-C passthrough cable extends smoothly and silently, ready for immediate use.
- With another press—or a remote command —the cable retracts seamlessly, keeping surfaces clutter-free.
- Compact, easy-to-install solution suitable for video, data transmission, and power delivery.
