# Innovations on track: Novus RetailSystem becomes Novus POS Solutions.

Since the company was founded in 1949, the Novus brand stands for:

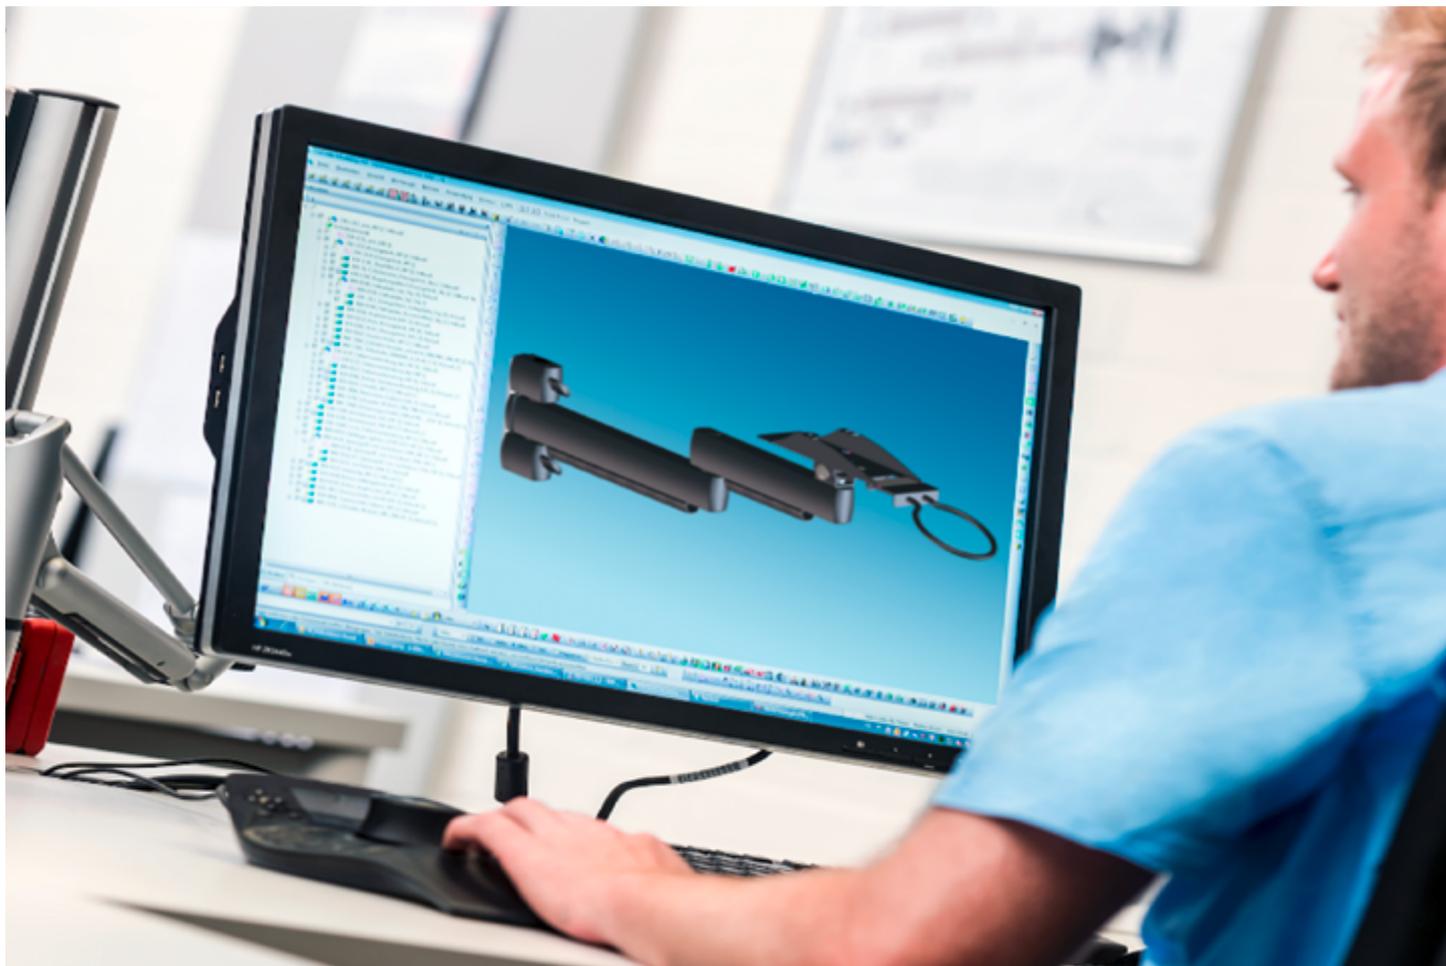

- innovative technology,
- sophisticated „German Engineering“,
- modular systems
- and high quality.

These attributes provide the basis for the modular Novus POS Solutions as the key to creating secure and attractive POS Solutions that are tailored to your needs with its versatile, flexible elements. Exactly this individuality is required for the checkout zone with its various demands.

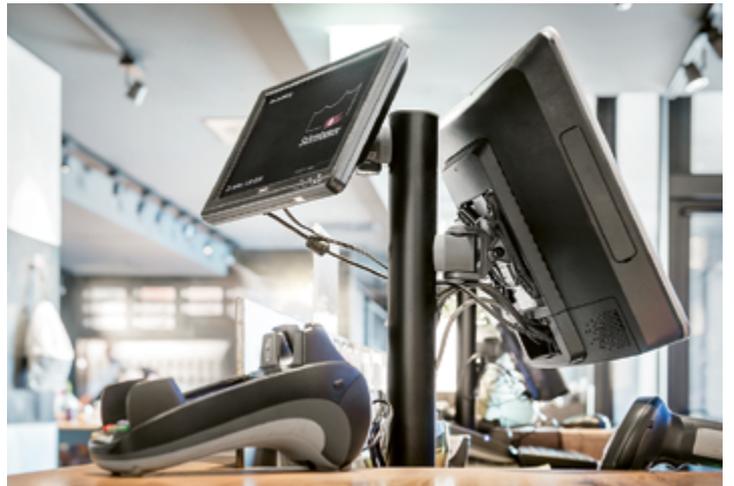

Our space-saving flexible products are perfectly integrable into the shop's design and enhance the user friendliness at the checkout with cleverly designed details.

On daily basis our engineers work on new solutions at the Research and Development Centre at the company headquarters in Lingen, Germany. We use advanced technology in our company's own production facilities to ensure the high quality of our products.

Let our expertise benefit your business:  
We design and produce solutions for you that are tailored in every detail to your specific requirements.

# One system – multi-purpose use

The modular system for individual solutions at your POS.

Knowing what's important to you: our POS Solutions and its components.

Screw-on and screw-through mounting for passing cables through the table.

High-quality silver- or black anodised aluminium profiles. Cables are passed through the inside of the column where they are covered by practical brush seals.

Infinitely height adjustable, the arms let you position terminals, keyboards and monitors individually.

Practical cable holders provide a secure, neatly organised cable management along the arm.

The right system for any demand.

## Mobile service perfectly integrated at the Point of Sale: Novus tablet holders.

The NOVUS TabletSafe and TabletFix expand the Novus POS Solutions with lots of practical and flexible tablet holders. Product and promotional information presented in a customer-friendly way as well as selling through mobile devices are the mark of modern customer communication and sales processes.

Whether at the point of sale or in the showroom, whether on the wall or on the counter, the versatile mounting options now provide a place for any tablet.

### NOVUS TabletSafe

High-quality metal frame with velour chrome surface and lacquered display screen

The metal frame and display screen in the anthracite version feature a colour coordinating lacquered finish

Lockable tablet holder for modern customer communication

Metal clips in the housing allow exact positioning of various tablets within the frame.

The NOVUS TabletSafe or connect plate is securely attached to the connect joint. The perfect cable management covers cables from the field of view.

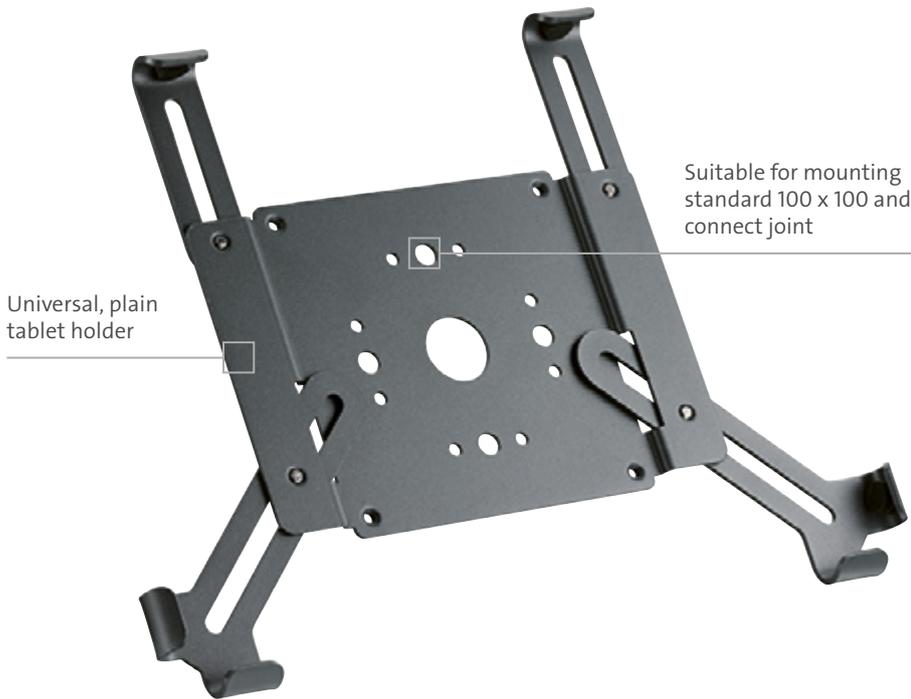

Control functions remain accessible by the practical apertures. If not used, they can be closed off with cover caps.

Unobtrusive and impressively practical: the integrated lock provides secure protection against theft.

## NOVUS TabletFix

High-quality powder coated metal finish

Universal tablet holder for use with various approximately 8"-10" tablets

## Everything in view.
